

CRYO ICE STICKS

GROUP
ACCESSORIES ACC | 006

PRODUCT

Cryo facials involve the rapid cooling of the skin to increase the flow of blood to the face, bringing more nutrients and oxygen to reduce puffiness and inflammation, and assisting in allergy relief. Pores are tightened and skin is firmed as increased lymphatic drainage occurs. Cell metabolism is boosted allowing for skin renewal and increased collagen production, to reveal a more youthful and radiant complexion. Crafted from medical grade stainless steel and filled with cooling liquid, they are best kept in the fridge or freezer. Run under water after removing from the freezer.

BEAUTY BENEFITS

- De-puff
- Lift, sculpt, tighten
- Reduce pores and inflammation
- Boost dermal blood circulation
- Brighten the complexion
- Prevent bruising
- Ease tension headaches
- Lymphatic drainage

APPLICATION

Cleanse the face and pat dry. Apply your favourite serum to help the cryo sticks glide across the skin. Use from the centre of the face, outward, to flush lymph and detoxify. Start at the top of your forehead with sweeping outwards movements. Move to the brow area and work your way around the eye area including resting the ice sticks on the eye brows, eye sockets and cheekbones. The cooling temperature will freshen the entire face. Work your way across each cheek moving from the centre of the face upwards and outwards. Complete by working the jaw line and resting the Cryo Ice Sticks on the nape of the neck, behind the ears and on the shoulders. Use time and time again for toned firm skin. Tip: they are great pre makeup! Rinse the Cryo Ice Sticks with water and towel dry. Place them back in their case and in the fridge or freezer until the next use.
