PRODUCT

This hero product improves the look of uneven skin tones. Formulated with Kojic acid that is a potent depigmentation active, licorice root extract, that whitens the skin and Vit. E to help brighten skin. This serum will help address issues such as dark spots, hyperpigmentation, sun damage and skin tone irregularities, leaving you with a beautiful, smooth, bright and even skin tone.

BEAUTY BENEFITS

This serum helps to reduce the appearance of skin discoloration, like dark spots, acne spots and age spots. A brightening serum that targets hyperpigmentation revealing a beautifully balanced, even skin tone.

APPLICATION

Apply 2-4 drops in the evening onto cleansed face and massage gently. Wait for the serum to fully absorb and follow with moisturizers and oil treatments to lock all the good stuff in and improve the effects of the serum. Keep away from direct solar exposure and use sun protection for better results.

BOTANICAL ACTIVES

Aloe vera (Aloe barbadensis):

Aloe Vera is one of the most complete cosmetics actives. With the action of natural nutrients, minerals, vitamins, amino acids and enzymes it stimulates cell regeneration to repair damaged tissues. It is an excellent enhancer in protective preparations. It has revitalizing properties, moisturizing, soothing and refreshing actions.

Kojic acid:

By-product of the fermentation process of malting rice for use in the manufacture of sake. Kojic acid is very effective for brightening an uneven skin tone. Kojic Acid inhibits the formation of the enzyme tyrosinase, which is responsible for melanin. It works well as an anti-spot and maintains a stable skin color. Moreover, it softens the skin and is an antioxidant.

Licorice root extract (Glycyrrhiza Glabra Root Extract):

The extract has been shown to decrease melanin content when applied to the skin and so reduce skin pigmentation. Licorice root extract acts as an anti-inflammatory to reduce itchy and inflamed skin. Offers anti-bacterial benefits for the skin.

Vitamin E (Tocopherol):

Vitamin E has many properties, but it stands out as being known as the vitamin of youth and beauty. It is an antioxidant that protects cells from all external aggression such as pollution, pesticides and stress, the main cause of premature aging. Vitamin E also contributes significantly to the production of energy.
